

FOSTER KIDS COUNT 2002

CLARENDON
COUNTY

A profile of South Carolina children in out-of-home placements

A Publication of the South Carolina Governor's Office – Division of Foster Care Review

DEMOGRAPHICS¹

Between 1995 and 2001 there were 154 children in out-of-home placements who were reviewed by the Foster Care Review Board.² Of these, 78.6% were African-American, 20.1% were Caucasian, and 1.3% were children of other races. There were 56 children in out-of-home placements reviewed by the Review Board in 2001, 43 children in 2000, 50 children in 1999, and 49 children in 1998.

Children in out-of-home placements represent an unchanging portion of the overall population of children under the age of 18 in the county. Those children in out-of-home placements reviewed by the Review Board constituted 0.66% of the population of all children in the county in 2001, compared to 0.51% in 2000, 0.62% in 1999, and 0.61% in 1998.

Note: "Other Race" includes children who are Bi-Racial, American Indian, Asian, and Hispanic or children of any other race not previously mentioned.

There were an equal number of boys and girls in care between 1995 and 2001. Children 16 years of age or older constituted 32.5% of the children in care, while 27.3% were between 10 and 15 years of age, 14.3% were between 6 and 9 years of age and 26.0% were 5 years of age or younger.

Between 1995 and 2001, 95 children entered the foster care system in Clarendon County and were reviewed by the Review Board. Of these children, 76.8% were African-American, 21.1% were Caucasian, and 2.1% were children of other races. Slightly more boys entered care than girls, 52.6% compared to 47.4%. In 2001, 22 children entered care, compared to 5 children in 2000, 12 children in 1999 and 10 children in 1998.

¹The children included in this report are those children in out-of-home placements who have been reviewed at least once by the Review Board. Children in out-of-home placements who have not been reviewed by the Review Board are not included in this report.

²The number of children in out-of-home placements may be higher in 2001 because of a change in when FCRB data was processed. This change allowed for a more accurate assessment of the children in foster care who are reviewed by the Review Board.

Children tend to enter care at a younger age. Of those children entering care between 1995 and 2001, 42.1% were 5 years of age or younger, 17.9% were between 6 and 9 years of age, 33.7% were between 10 and 15 years of age, and 6.3% were 16 years of age or older. Of the boys entering care between 1995 and 2001, 72.0% were under the age of 10, while 53.3% of the girls were 10 years of age or older.

Of the children who entered care between 1995 and 2001, 64.4% of the African-Americans and half of the Caucasians were under the age of 10.

Between 1995 and 2001, 113 children left custody of the county. Of these children, 77.0% were African-American and 23.0% were Caucasian. There were no children of other races reviewed by the Review Board who left care between 1995 and 2001. There were 15 children who left care in 2001, 22 children in 2000, 6 children in 1999, and 13 children in 1998. Fewer boys left care between 1995 and 2001 than girls, 44.2% compared to 55.8%.

Children tend to leave care at an older age. Of those children leaving care between 1995 and 2001, 24.8% were 5 years of age or younger, 15.0% were between 6 and 9 years of age, 22.1% were between 10 and 15 years of age, and 38.1% were 16 years of age or older. Of the boys leaving care between 1995 and 2001, 54.0% of the boys were under the age of 10, while 71.4% of the girls were 10 years of age or older.

Of the children who left care between 1995 and 2001, 64.4% of the African-Americans and 57.5% of the Caucasians were 10 years of age or older.

LENGTH OF TIME IN CARE

The longer a child is away from their home or a nurturing family environment, the more damaging it can be to the normal development of the child. For this reason, a major goal of the Review Board is to ensure that children achieve permanency as quickly as possible.

Children today are spending the same amount of time in the custody of the county as children in previous years. Of those children who left care in 2001, the average length of time children spent in care is slightly up by an average of 1 month from the length of time children spent in care between 1995 and 2000. In 2001, the average length of time spent in care was 3.8 years, compared to 3.3 years in 2000, 3.6 years in 1999 and 3.3 years in 1998.

Between 1995 and 2001, children who left care spent an average of 3.6 years in out-of-home placements in the county. Caucasian children spent longer in care on average than African-American children. Between 1995 and 2001, Caucasian children spent 4.3 years in care, compared to 3.4 years for African-American children. There were no children of other races reviewed by the Review Board who left care between 1995 and 2001.

Boys spent on average 3.5 years in care between 1995 and 2001, compared to girls who spent on average 3.6 years in care. Children 16 years of age or older spent the longest amount of time in care, averaging 5.6 years in care, compared to 3.2 years for children between 10 and 15 years of age, 2 years for children between 6 and 9 years of age, and 1.9 years for children 5 years of age or younger.

NUMBER OF PLACEMENTS

Research shows the initial placement in foster care is extremely traumatic for a child. Additional changes in placement once in the foster care system can be detrimental to children's development, affecting their ability to learn, establish relationships and develop as stable, secure individuals.

Children today are experiencing fewer changes in placement than children in previous years. Of those children who left care in 2001, the average number of changes in placement is down by an average of 2 1/2 placements from the number of changes in placement children experienced between 1995 and 2000. In 2001, the average child who left care had lived in 2.3 different placements while in the custody of the county, compared to 4.1 in 2000, 7.7 in 1999 and 3 in 1998.

Between 1995 and 2001, children who left care had lived in 3.9 different placements while in out-of-home placements in the county. Caucasian children experienced more changes in placement on average than African-American children. Between 1995 and 2001, Caucasian children experienced 4.2 changes in placement, compared to 3.8 for African-American children. There were no children of other races reviewed by the Review Board who left care between 1995 and 2001. Boys experienced on average 4 changes in placement, compared to 3.9 for girls.

Children 16 years of age or older had experienced the most changes in placement on average, 6.1 changes in placement, compared to 3.3 for children between 10 and 15 years of age, 2.8 for children between 6 and 9 years of age, and 1.9 for children 5 years of age or younger.

Most children who leave care experience between 1 and 3 changes in placement while in the custody of the county. Between 1995 and 2001, 62.8% of the children experienced between 1 and 3 changes in placement while in care, while 23.0% experienced 5 or more placements.

Table 1: Number of Placements for Children Leaving Care 1995-2001		
Number of Placements	1995 - 2001	
	Number	Percent
1	21	18.6
2	27	23.9
3	23	20.4
4	16	14.2
5	4	3.5
6	5	4.4
7	2	1.8
8	2	1.8
9	0	0.0
10+	13	11.5
Total	113	100.0

Of the children who left care between 1995 and 2001, 30.1% were placed in foster homes, 16.8% were in Medicaid therapeutic placements, 12.4% were in group homes or institutions, 3.5% were in adoptive placements, 17.7% were with relatives, 14.2% were with one or both natural parents, 1.8% were runaways, and 3.6% were in other types of placements.

It seems that those children who are hardest to place are more likely to change placements and spend longer in care than children who are not as difficult to place. There is a strong, positive relationship between the number of placements children experience in the county and how long they spend in care ($r = .544$). The number of changes in placements a child experiences accounts for 29.6% of the variability in the number of months a child spends in out-of-home placement.

ACHIEVING PERMANENCY

Permanency for a child means placement with a “forever family.” Families are the single most important influence in a child’s life. Children depend on their families for their material needs and wants, nurturing and leadership. A child can achieve legal permanency upon leaving the foster care system either by returning home to their natural parent or by being adopted.

Fewer children today are not achieving permanency than children in previous years. The number of children who did not achieve permanency in 2001 is down by an average of 30.6% from the average number of children who left care between 1995 and 2000. In 2001, 40.0% of the children who left care did not achieve permanency, compared to 81.8% of the children in 2000, 83.3% in 1999, and 76.9% in 1998. Between 1995 and 2001, 62.8% of the children who left care did not achieve permanency. Of these, 50.7% were placed in the care of someone other than their parent, and 49.3% aged out of the system.

Between 1995 and 2001, African-Americans constituted 77.5% of the children who left care and did not achieve permanency, compared to 22.5% Caucasians. There were no children of other races reviewed by the Review Board who left care between 1995 and 2001. Boys constituted 38.0% of those who did not achieve permanency, compared to 62.0% girls. Girls were more likely than boys to age out of care, comprising 65.7% of all children aging out between 1995 and 2001.

Children leaving care without achieving permanency were more likely to be older children. Children 16 years of age or older constituted 56.3% of those children who did not achieve permanency between 1995 and 2001, while 19.7% were between 10 and 15 years of age, 8.5% were between 6 and 9 years of age, and 15.5% were 5 years of age or younger. Of the children 16 years of age or older, 81.4% aged out, 7.0% returned home to at least one of their natural parents, and 11.6% were placed in the custody of a non-parent.

Children who did not achieve permanency when leaving care between 1995 and 2001 had spent more time in care and experienced more changes in placement while in care than children who achieved permanency. The average length of time these children spent in care was 4.3 years, compared to 2.4 years for children who achieved permanency. The average number of changes in placement experienced by these children was 4.5 placements, compared to 3 placements for children who achieved permanency.

RECIDIVISM RATES

Children who come back into care are some of the most vulnerable children in foster care because they have been taken into custody more than once. Subsequent removals increase the risk for further developmental delays and have even greater impact on a child's ability to succeed later in life.

Fewer children today are returning to foster care than children in previous years. In 2001, the number of children who had been in care before is down by an average of 14.2% from the number of children between 1995 and 2000 who had been in care before. In 2001, 1.8% of the children reviewed by the Review board had been in care before, compared to 4.9% in 2000, 10.4% in 1999, and 10.9% in 1998.

Between 1995 and 2001, 6.5% of the children reviewed by the Review Board had been in care before. Of these children, most were Caucasians, comprising 70.0%, compared to 30.0% African-Americans. There were no children of other races reviewed by the Review Board between 1995 and 2001 who had returned to care. Boys returned to custody of the county at a slower rate than girls, 30.0% compared to 70.0%.

Of these children, 40.0% were 16 years of age or older, 50.0% were between 10 and 15 years of age, and 10.0% were between 6 and 9 years of age. There were no children 5 years of age or younger reviewed by the Review Board between 1995 and 2001 who had been in care before. Children who had been in care before have spent an average of 6.5 years in care and have experienced an average of 8.9 changes in placement.

Re-entry into foster care can occur for a number of reasons. The Review Board tracks the immediate location of children prior to a child's returning to foster care. Tracking this information brings insight into the lack of permanency achieved for children previously in foster care.

A child who leaves care to return home or go live with a relative has a greater risk of coming back into care than children who leave care and are adopted. Children who came back into foster care from home or from a relative constituted 80.0% of the children between 1995 and 2001 who had been in care before.

AREAS OF CONCERN

State and Federal law regulates the Department of Social Service's efforts to secure permanent homes for children in out-of-home placements. These laws, combined with agency policies and procedures, are designed to move children expeditiously out of care to a permanent placement. When these laws and policies are not followed, a child's ability to leave care and to achieve permanency upon leaving care can be significantly impacted.

In 2001, Review Board members held 8 meetings with an average of 10 children reviewed at each meeting. Of the 51 children reviewed, 66.7% had at least one area of concern cited by the local Review Board.

A total of 72 deficiencies in systemic efforts to secure permanent homes for children in care were cited in 2001. Of these deficiencies, 47.2% were direct violations of the law, and 52.8% were violations of program policies or procedures. The number of deficiencies cited by the Review Board increased by 44.0% from the number of deficiencies cited in 2000.

In 2001, the most often cited legal violation was "No Timely Merits Hearing," which constituted 44.1% of all legal Areas of Concern, up from none in 2000. The failure to hold merits hearings according to time frames outlined by state and federal law and the failure to conduct adoption assessments consistent with program policies and procedures unnecessarily lengthens the time children remain in foster care.

Table 2: Legal Areas of Concern 2000 - 2001				
Area of Concern	2001		2000	
	Number	Percent	Number	Percent
No Timely Merit Hearing	15	44.1	0	0.0
No Timely Permanency Plan Hearing	6	17.6	2	10.5
No Thorough Adoption Assessment	4	11.8	0	0.0
No Timely Probable Cause Hearing	2	5.9	1	5.3
Non-Compliance with Court Order	2	5.9	3	15.8
No Court Order at Review	2	5.9	2	10.5
Other Statutory Violation	1	2.9	2	10.5
No Timely FCRB	1	2.9	1	5.3
No Face-to-Face Contact	1	2.9	8	42.1
Adoption Complaint Not Filed Timely	0	0.0	0	0.0
Adoption Not Consummated Timely	0	0.0	0	0.0
No Child Specific Recruitment	0	0.0	0	0.0
Total	34	100.0	19	100.0

The most often cited program violation was lack of a complete or appropriate case plan which constituted 23.7% of all program Areas of Concern, slightly up from 22.2% in 2000. The case plan document is critical to permanency planning as it serves as the road map for successfully moving children through the foster care system. Through sound case planning, children can be moved through the foster care system safely and swiftly.

Table 3: Program Areas of Concern 2000 - 2001				
Area of Concern	2001		2000	
	Number	Percent	Number	Percent
Incomplete/Inappropriate Case Plan	9	23.7	6	22.2
Lack of Progress Permanent Plan	5	13.2	4	14.8
P: TPR Summary Not Submitted Timely	5	13.2	0	0.0
P: No Copy of Pleadings	4	10.5	0	0.0
P: No Progress Reports	4	10.5	7	25.9
P: Other Policy/Procedure	4	10.5	1	3.7
P: No Timely Referral to Adoption	3	7.9	1	3.7
No 3 Week Notice to Parties	2	5.3	0	0.0
No Current Case Plan	1	2.6	0	0.0
Other	1	2.6	0	0.0
Interested Parties Not Invited	0	0.0	1	3.7

P: Case Plan Expired	0	0.0	0	0.0
P: Conflict with Permanent Plan	0	0.0	4	14.8
P: Lapse in Case Planning	0	0.0	0	0.0
P: No Advance Packets	0	0.0	1	3.7
P: No Diligent Search	0	0.0	2	7.4
P: No Psychological Reports at Review	0	0.0	0	0.0
Total	38	100.0	27	100.0

Note: "P:" Indicates Agency Policy/Procedure Violation

SUMMARY

Facing the Scope of Problems:

The data on foster children and the length of time spent in care, the number of changes in placements experienced, whether permanency is achieved, and recidivism rates provide a problematic picture of children in out-of-home placements in Clarendon County. Children in out-of-home placements in this county are spending more than 1/5th of their childhood in foster care. The average child entering care today can expect to change placements 4 times before leaving care. Almost 2 in 3 children will leave the system without being placed with a "forever family."

Of the children reviewed by the review board between 1995 and 2001, almost 1 in 10 children had been in care before. Of the children who had been in foster care before, 3 in 5 children came back into care from one or both of their natural parents. This and other data in this report suggests that children in out-of-home placements in this county are at risk of not becoming self-supporting, contributing members of our communities and state.

Emphasizing the Positive:

South Carolina Foster Kids Count reports have been developed to describe the problems of foster children in each of the counties. Fortunately, the majority of children are doing well. One simple description is the percentage of children who do not fall into the problem categories reported. In the county, more than 1 in 3 children who leave custody of the county are placed with a "forever family." Of the children less than 16 years of age, more than half are achieving permanency.

Children today are experiencing fewer changes in placement while in care than children in previous years. The majority of foster children experience just between 1 and 3 changes in placement while in care and children under 10 years of age experienced on average 2 placements while in care. More than 9 in 10 children in the custody of the county were there for the first time. Children who leave to be adopted are at virtually no risk of returning to care.

All children in out-of-home placements in this county deserve a stable home with a "forever family." These children also deserve our best efforts for ensuring that their stay in foster care is as short as possible and without frequent changes in placements. The Review Board acknowledges the good work and dedication of those in child welfare across the county and encourages continued positive change for all children in foster care.

This version of the Foster Kids Count report will be revised on an annual basis or as more recent and additional data becomes available. Unless otherwise noted, statistical data presented in this profile was obtained from the Foster Care Review Board database. Please utilize local data sources whenever possible to supplement the profile provided throughout our report.

Inquiries and copies of reports for other counties should be made to Tina Hudson, Data Management and Research Administrator, or Denise Barker, Director, Division of Foster Care Review, 1205 Pendleton St., Columbia, SC 29201 Phone: (803) 734-0474 Fax: (803) 734-1223.

Comparable reports for all 46 counties and for the state can also be found on the World Wide Web at:
